Introduction

The evidence provides current employment milestone data for advanced program completers working in NC Public Schools.

Data Description:

The data in Table 1 is obtained from the NC Department of Public Instruction Employment File. This file is provided in the Fall and Spring to NC Educator Preparation Programs. Employment data is obtained from district payroll and budget information and merged with Title II and EPP reports for completers. Employment data is not linked to the NC Teacher License system. There are also several notable limitations including that completers will not be included in the file if the license was not applied for and made effective within one year of graduation date. Other data limitations include possible errors in Title II and EPP completer reporting or district budget codes that do not align with position (i.e., Superintendents).

Table 1. Positions Held by ECU Graduates as of December 2020

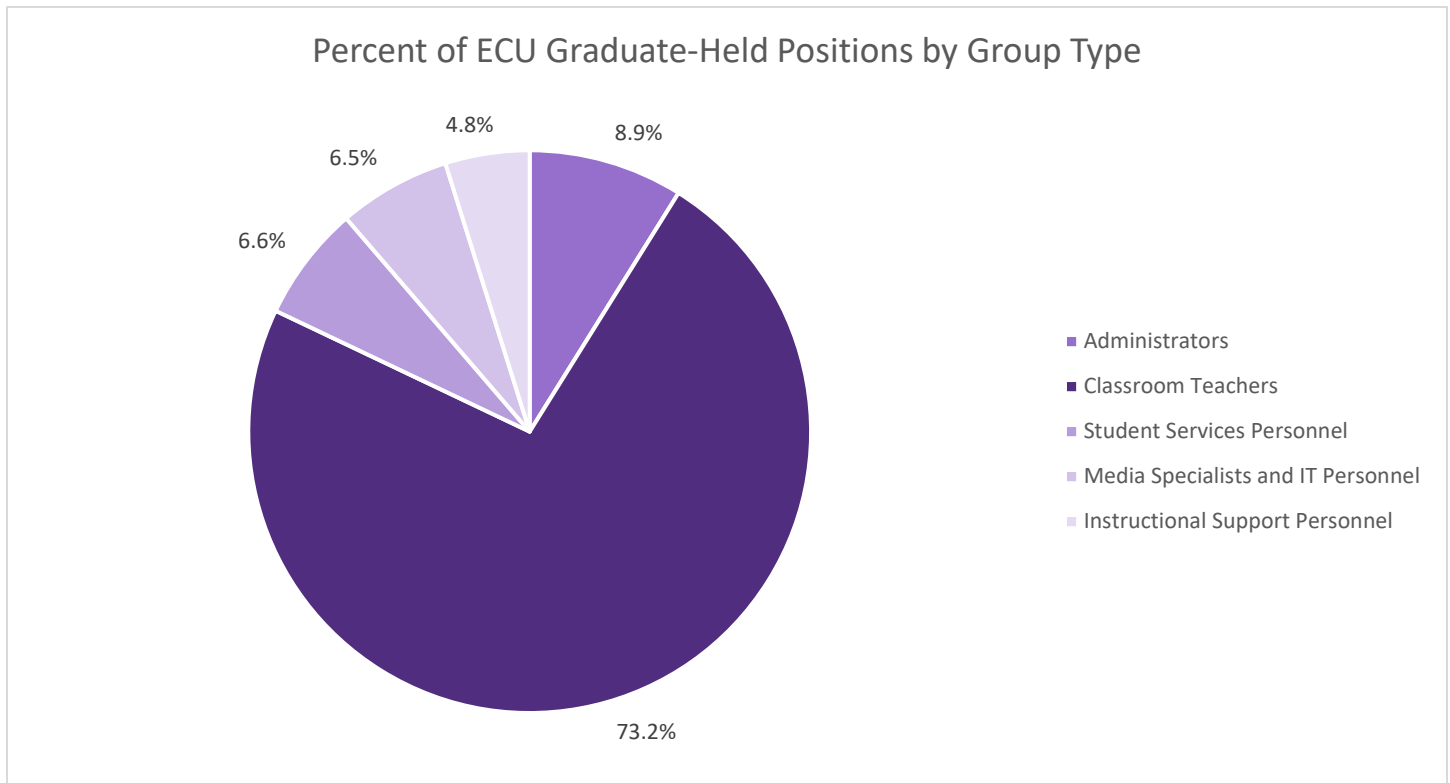

Employment data is obtained from the NC Dept. of Public Instruction Employment file. This file is a compilation of district reported payroll data and is not inclusive of all currently employed completers due to discrepancies in data reporting.
